## Compatibility of LIM and LP versions

It is recommended to install the LIM at the same version as LUNA PLATFORM, however in some cases it may be necessary to use a new LIM with the old LP.

Below is a table of compatible versions.

| LIM version           | Minimum compatible LP version |
|-----------------------|-------------------------------|
| v.5.53.0 and higher   | v.5.53.0                      |
| v.5.32.0 ... v.5.51.6 | v.5.32.0                      |
